karunyajane@gmail.com | +91 9443289794

EDUCATION

BTECH AI AND DS
KONGU ENGINEERING
COLLEGE

Grad. May 2026 | CGPA : 8.51/ 10

HSC

SDA MATRIC HR.SEC SCHOOL

Grad. May 2022 | Per : 82

SSLC

SDA MATRIC HR.SEC SCHOOL

Grad. May 2020 | Per : 92

AREAS OF INTEREST

Machine Learning
Predictive Analytics
Business Intelligence

SKILLS

TECHNICAL

Programming:

• Python • SQL • C • Java

Tools and Frameworks:

• ComfyUI • RunPod • Docker • Git
• Power BI • Tableau
• NumPy • Pandas
• TensorFlow • SciKit-Learn

ACHIEVEMENTS

- Best Paper Award for Research paper
- 1st in Paper Presentation at Autonix
- 2nd in Paper Presentation at MarkUs

LEADERSHIP

Associate Secretary	AIA (2025 - 26)
Executive Member	AIA (2024 - 25)
Executive Member	EPC (2023 - 24)

PUBLICATIONS

IEEE "Real-Time Driver Alertness Assessment Using Neural Networks," 2025 International Conference

SUMMARY

- AI Engineer with experience in Machine Learning, Deep Learning, and Gen AI workflows. Skilled in Python, TensorFlow, Scikit-Learn, Docker, ComfyUI, and RunPod for developing, deploying, and optimizing AI solutions. Experienced in building predictive models, CNN-based computer vision, and data-driven applications, with a focus on model performance, and real-world impact.

EXPERIENCE

CODA | Senior Analyst (Contract) – Shell

May 2026 – Present

- Developed and maintained Power BI dashboards and reports, enabling stakeholders to monitor key financial metrics and trends effectively.
- Built interactive dashboards that improved stakeholder decision-making efficiency by 60%.

SRV LABS | AI Engineer

Dec 2025 - Apr 2026 | Intern

- Developed AI-driven automation workflows, reducing manual data processing time by approximately 40%.
- Built Python-based web scraping pipelines to extract, clean, and structure data from dynamic websites, improving data availability for analysis.

SECIQ | Security Analyst

August 2025 – September 2025 | Intern

- Performed Web Application VAPT aligned with OWASP Top 10, identifying and documenting major security vulnerabilities.
- Assisted in implementing DevSecOps practices by conducting security checks in CI/CD pipelines and validating remediation fixes.

PROJECTS

BREAST CANCER PREDICTION | Machine Learning

- Built a machine learning model using the Wisconsin Breast Cancer dataset, achieving 96% accuracy.
- Evaluated model performance using Random Forest, Logistic Regression, KNN, SVC, MAE, and Confusion Matrix.
- GitHub : Breast Cancer Prediction

DROWSY DRIVER DETECTION | Deep Learning | CNN

- Developed a CNN-based model to detect driver drowsiness with 96% accuracy.
- Utilized VGG19, InceptionV3, and DenseNet architectures; optimized training using Adam and ImageDataGenerator.
- GitHub : Drowsy Driver Detection

DATA ANALYSIS | Power BI

- Analyzed e-commerce datasets to improve customer experience.
- Conducted HR data analysis to support employee retention strategies.
- Performed patient data analysis to uncover healthcare trends.
- GitHub : E-commerce Data Analysis, HR Data Analysis, Healthcare Data Analysis
